# bitwarden

The Most Trusted Open Source Password Manager for Business

Bitwarden offers the easiest and safest way for teams and individuals to store and share sensitive data from any device.

Trusted Security
Your private information is protected with end-to-end encryption before it even leaves your device.
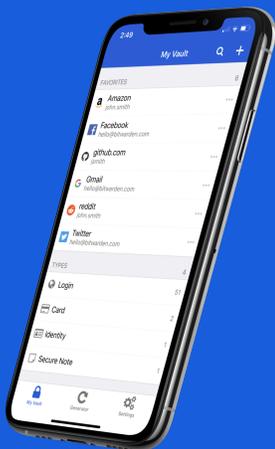

Open Source Transparency
Bitwarden source code, features, and infrastructure security are vetted and improved by our global community.

Global Access
Access Bitwarden from anywhere, with any platform, in 40 languages.

Empower Your Team and Eliminate Vulnerabilities

Customize and control password requirements and administrative policies that will empower employees to practice good password hygiene.

Monitor and manage security vulnerabilities using the Bitwarden Vault Health Reports with actionable insights to exposed, reused, weak, or potentially compromised passwords, as well as identify any items in your vault with inactive 2FA.

Secure cloud syncing features allow you and your team to access vault data from anywhere, on any device

Bitwarden Send

A trusted way to securely share information directly with anyone.

- Easily transmit text or files including passwords, billing credentials, or business documents fully encrypted
- Share sensitive data within your Bitwarden Vault from any browser, mobile device, or desktop application
- Set deletion times ensure your information does not stick around
