Change App Appearance

The Bitwarden web vault, browser extension, desktop app, and mobile app come packed with stylish themes. Browser extensions also include a few other appearance options:

⇒ Web app

To change the theme of your web app:

1. Navigate to **Settings** → **Preferences**:

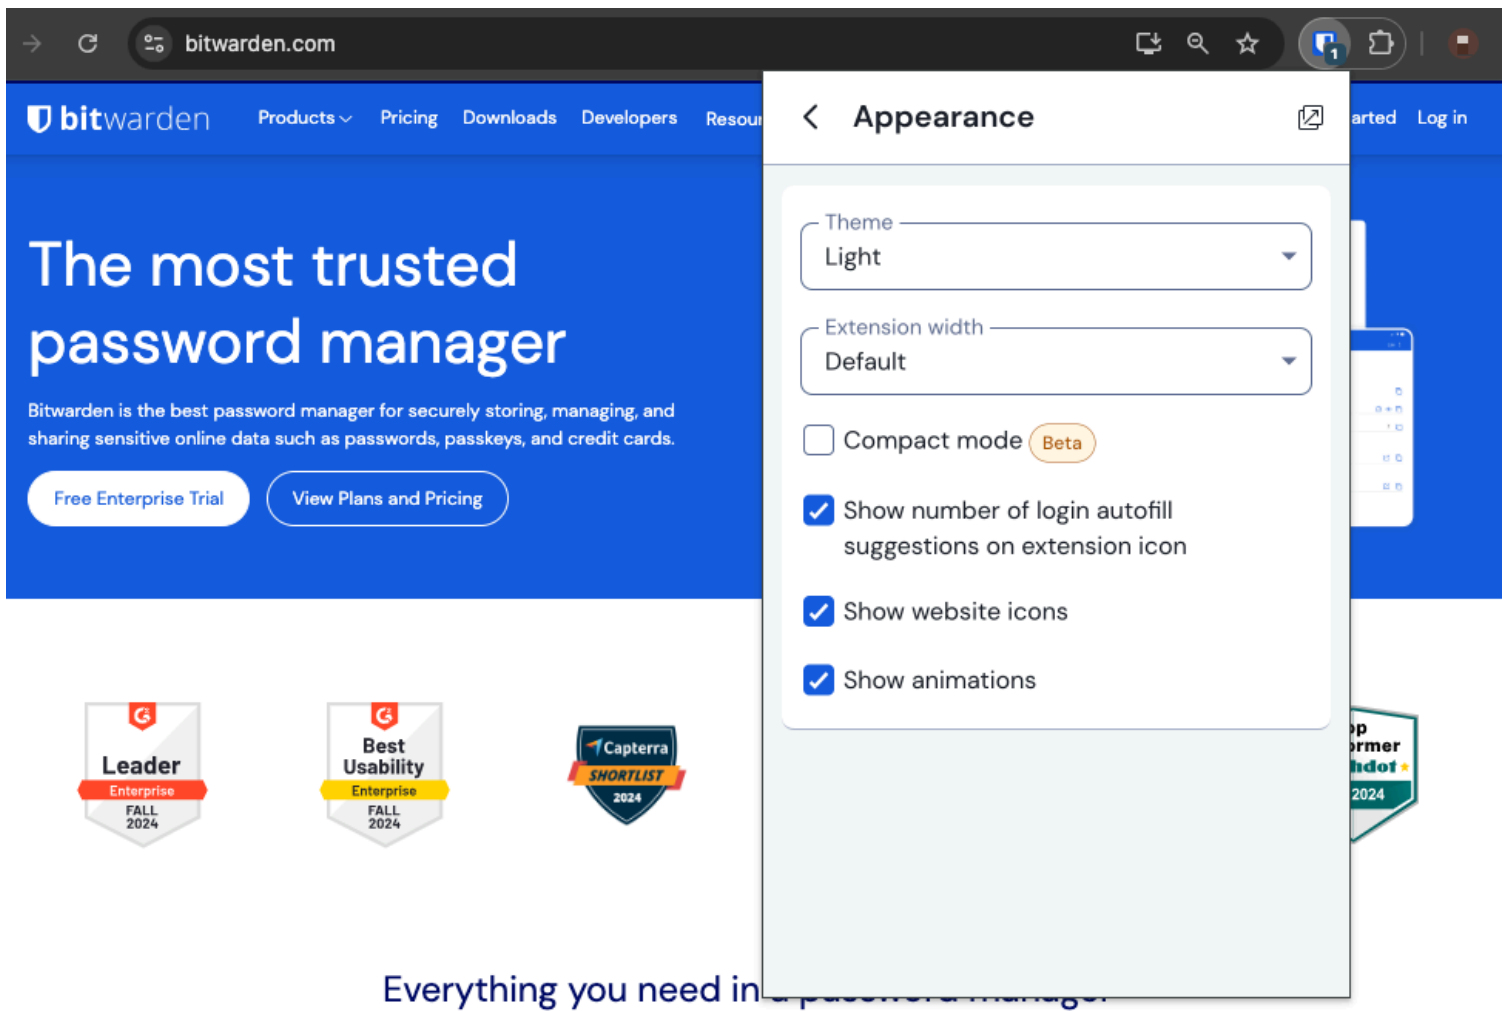

Preferences

2. From the **Theme** dropdown, choose your favorite theme and select **Save**!

⇒ Browser extension

To change the theme of your browser extension:

1. Open the browser extension's **Settings** tab.
2. Select **Appearance**.

Everything you need in a password manager

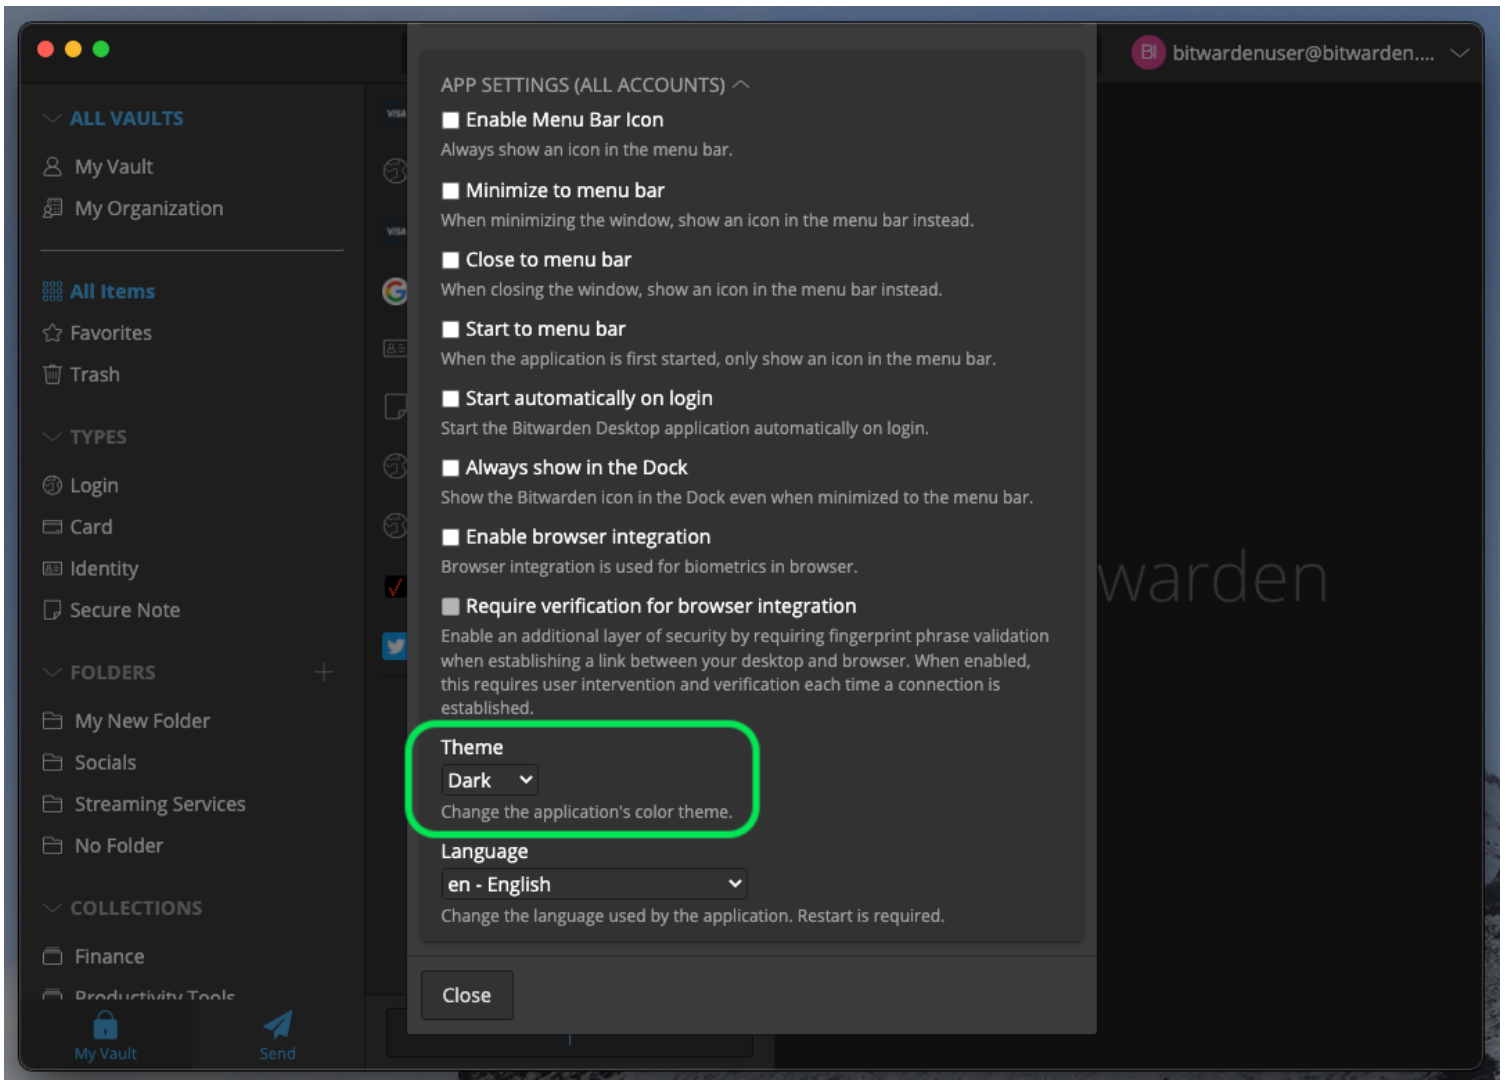

Select theme browser ext

3. Use the **Theme** dropdown to select your favorite theme.
4. Use the **Extension width option** to expand the dimensions of the browser extension.
5. Use **Compact mode** to increase the information density of what's shown in the browser extension.

⇒Desktop

To change the theme of your desktop app:

1. Open the desktop app's **Preferences** panel (on Windows, **File** → **Settings**) (on macOS, **Bitwarden** → Preferences).
2. Scroll to the **App Settings** section and use the **Theme** dropdown to select your favorite theme!

Change Theme

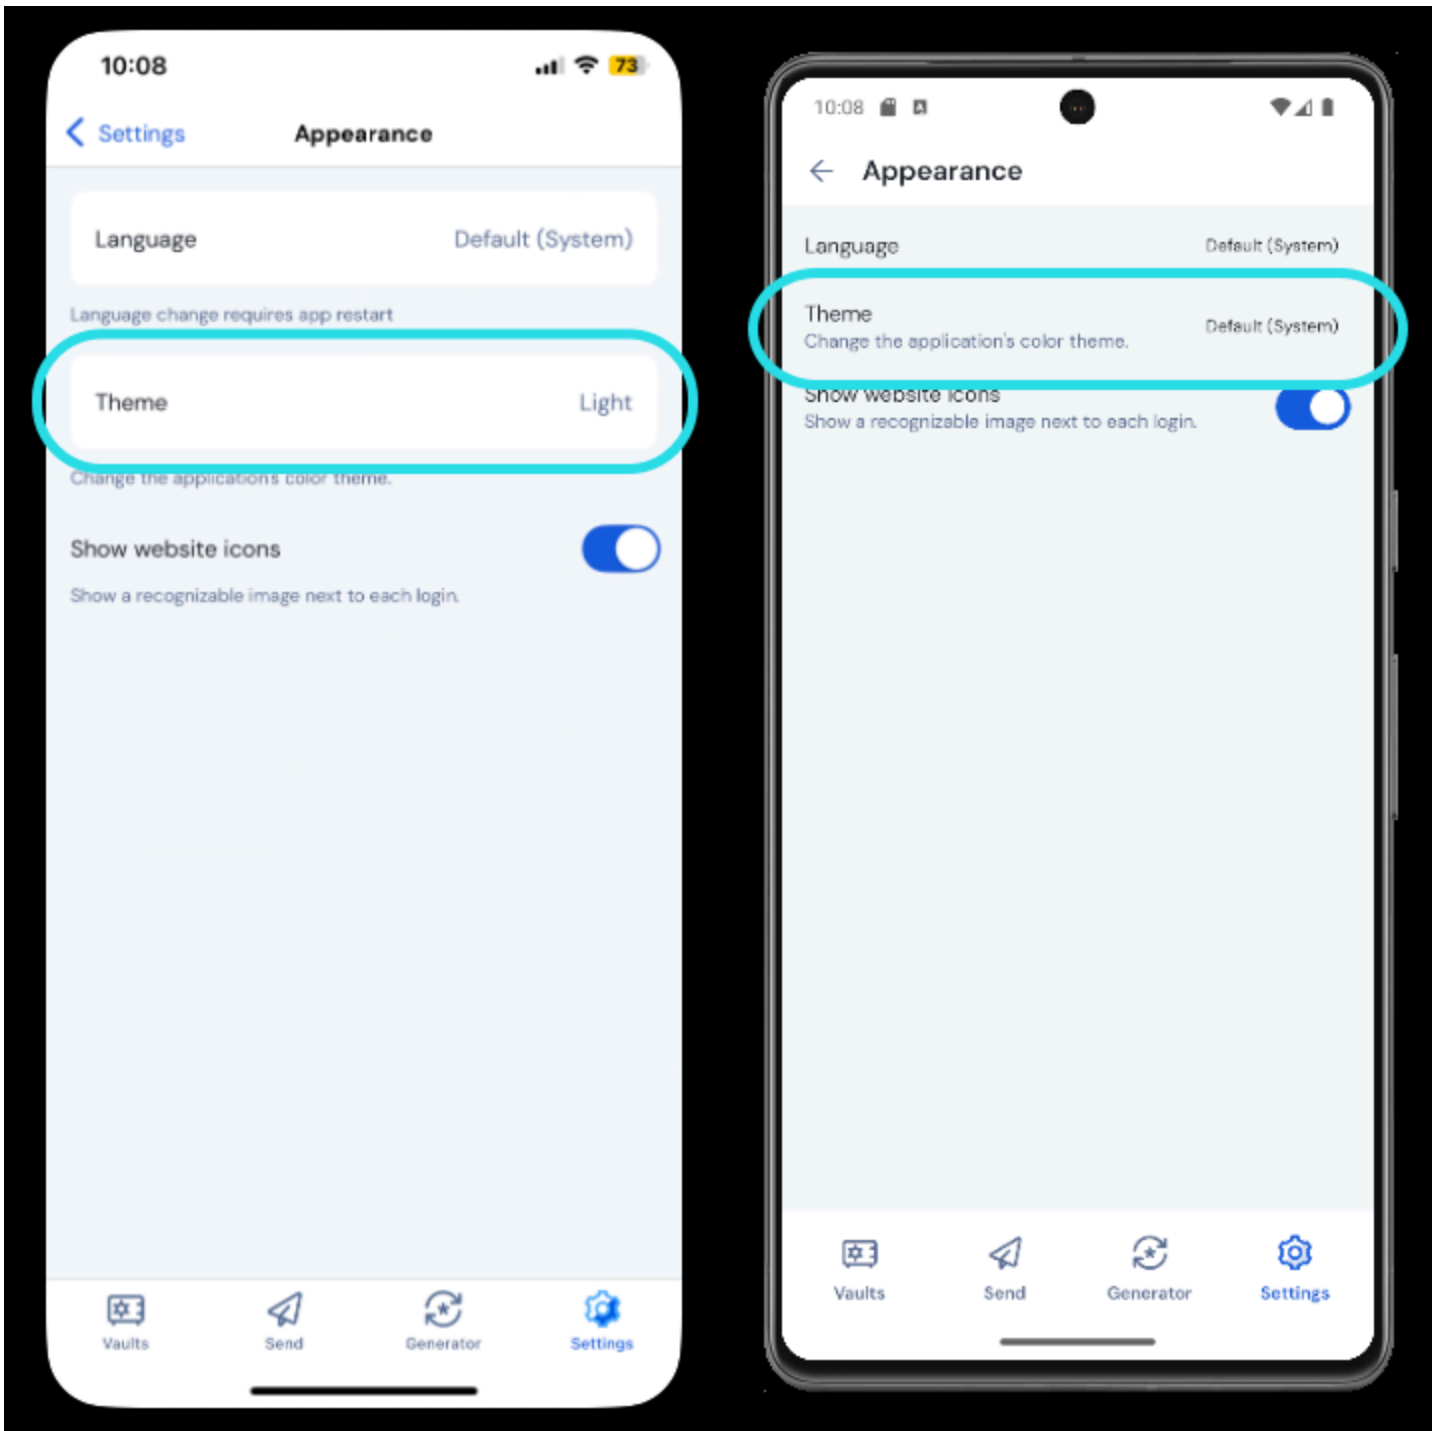

💡 Tip

Theme is set globally for all logged-in accounts in the desktop app. [Learn more.](#)

⇒ **Mobile**

To change the theme of your mobile app:

1. Open the mobile app's **Settings** tab.
2. Tap **Appearance**.
3. Tap the **Theme** option to select your favorite theme:
