Delete an Account or Organization

Deleting a Bitwarden account or organization permanently deletes the account or organization and **all data that is associated with it**. Bitwarden does not "soft delete" any data.

Deleting an account or organization does not automatically cancel a subscription. [Learn how to cancel a subscription](#) before deleting an account.

If you are locked out of your vault and deleting your account so that you can create a new one, [contact us](#) and we can help transfer your subscription to the new account.
