### Panther SIEM

Panther is a security information and event management (SIEM) platform that can be used with Bitwarden organizations. Organization users can monitor event activity with the Bitwarden app on their Panther monitoring system.

#### Setup

#### **Create a Panther account**

To start you will need a Panther account and dashboard. Create a Panther account on their website.

#### Initialize Panther Bitwarden Log Source

- 1. Access the Panther dashboard.
- 2. On the menu, open the **Configure** dropdown and select **Log Sources**.

Panther Log Sources

3. Select Onboard your logs.

4. Search **Bitwarden** in the catalogue.

What typ <sub>Bir</sub>	e of logs do you want to monitor with You can search by service, category or log type warden	this source? s
Filter by Catego	ry AWS Application Cloud Custom Log Forma Showing results for "Bitwarden"	ts Host Network
<b>Ditwarden</b> Gain visibility into abnormal user activity in your organization's Bitwarden account.	₩ GitLab Monitor your Gitlab activity.	Zeek Inspect all network traffic for signs of suspicious activity.
G Google Workspace (C 21) Monitor activity across Google Workspace.	Teleport Inspect all SSH access activity for signs of suspicious behavior.	Monitor your network for suspicious activity.
Dor	n't see the log source you're looking for? <b>Reques</b>	t it here

Elastic Bitwarden integration

5. Click on the **Bitwarden** integration and select **Start Setup**.

#### **Connect your Bitwarden organization**

After you select **Start Setup** you will be brought to the configuration screen.

#### (i) Note

Panther SIEM services are only available for Bitwarden cloud hosted organizations.

- 1. Enter a name for the integration and then select **Setup.**
- 2. Next, you will have to access to your Bitwarden organization's **Client ID** and **Client Secret**. Keeping this screen open, on another tab, log in to the Bitwarden web app and open the Admin Console using the product switcher:

### **D** bit warden

Organization api info

- 4. Copy and paste the client\_id and client\_secret values into their respective locations on the Bitwarden App setup page. Once you have entered the information, continue by selecting **Setup** again.
- 5. Panther will run a test on the integration. Once a successful test has been completed, You will be given to option to adjust preferences. Complete the setup by pressing **View Log Source**.

#### 🛈 Note

Panther may take up to 10 minutes to ingest data following the Bitwarden App setup.

#### Start monitoring data

- 1. To begin monitoring data, head over to the primary dashboard and select Q **Investigate** and **Data Explorer**.
- 2. On the Data Explorer page, select the panther\_logs.public database from the drop down menu. Make sure that bitwarden\_even ts is being viewed as well.
