Password Manager Plans

This article describes each Bitwarden Password Manager subscription plan to help you along your password management and secure data storage journey. This article reflects current Password Manager plans, most recently updated on June 04, 2024. Users who created accounts prior to that date can learn about their plans here.

To see Secrets Manager plans instead, see here.

Personal plans

Personal plans are designed to give you or your family all the tools needed to securely manage data:

Free individual

We believe everyone should have access to password security tools. The core features of the Bitwarden Password Manager are 100% free, including unlimited storage of logins, notes, cards, and identities, access to Bitwarden on any device, a secure password generator, and more. Signup **for free**.

Premium individual

Upgrade your individual account to unlock premium password security and management features, including advanced 2FA options, the Bitwarden authenticator (TOTP), encrypted file attachments, emergency access and more. Upgrade **now**.

> ⓘ **Note**
>
> Premium does not include secure data sharing. In order to access sharing features, you will need a subscription to an organization (Free, Families, Teams, or Enterprise). Paid organizations (Families, Teams, or Enterprise) include premium features for all users enrolled in that organization.

Premium individual subscriptions are billed annually.

Free organizations

Start a Free organization to store and securely share data with one other user. Free organizations offer both users all the core features of Password Manager and secure data sharing in up to two collections. Any user of any plan can be the owner of one Free organization.

Families organizations

Start a Families organization to share private data between you and five friends or family members. Families organizations include all premium features for all six users and unlimited secure data sharing within the families organization.

Families organizations subscriptions are billed annually.

Business plans

Bitwarden business plans are designed to meet the storage and sharing needs of small teams, growing companies, and the largest enterprises:

Teams organizations

Teams organizations are great for securely sharing data with your coworkers, department, or entire company. Teams organizations include all premium features for all enrolled users, unlimited secure data sharing within the Teams organization, and a suite of operational tools such as event logging and an API for organization management.

Teams organizations can add Secrets Manager into their product portfolio for an additional fee.

Unlike Families organizations and Free organizations, Teams can have an unlimited number of users (priced per user). Teams organizations subscriptions can be billed annually or monthly.

Enterprise organizations

Start an Enterprise organization to secure your business secrets. Enterprise organizations include all premium features for for all enrolled users, all operational tools included in **teams organizations**, and enterprise-only tools like SSO authentication, enterprise policy enforcement, and a self-host option.

Enterprise organizations can add Secrets Manager into their product portfolio for an additional fee.

Unlike Families organizations and Free organizations, Enterprise organizations can have an unlimited number of users (priced per user). Enterprise organizations subscriptions can be billed annually or monthly.
