## Unassigned vault items moved to Admin Console

With [recent migrations to a new permissions structure](#) that brings greater collections management flexibility to your organization, vault items that are not assigned to a specific [collection](#) are now no longer displayed in your Password Manager **All vaults** view.

**You haven't lost access to these items!** You can assign these items to collections so that they will be displayed in the **All vaults** view.

To view these items and assign them to collections in-bulk:

1. Using the Bitwarden web app, open the Admin Console using the product switcher:

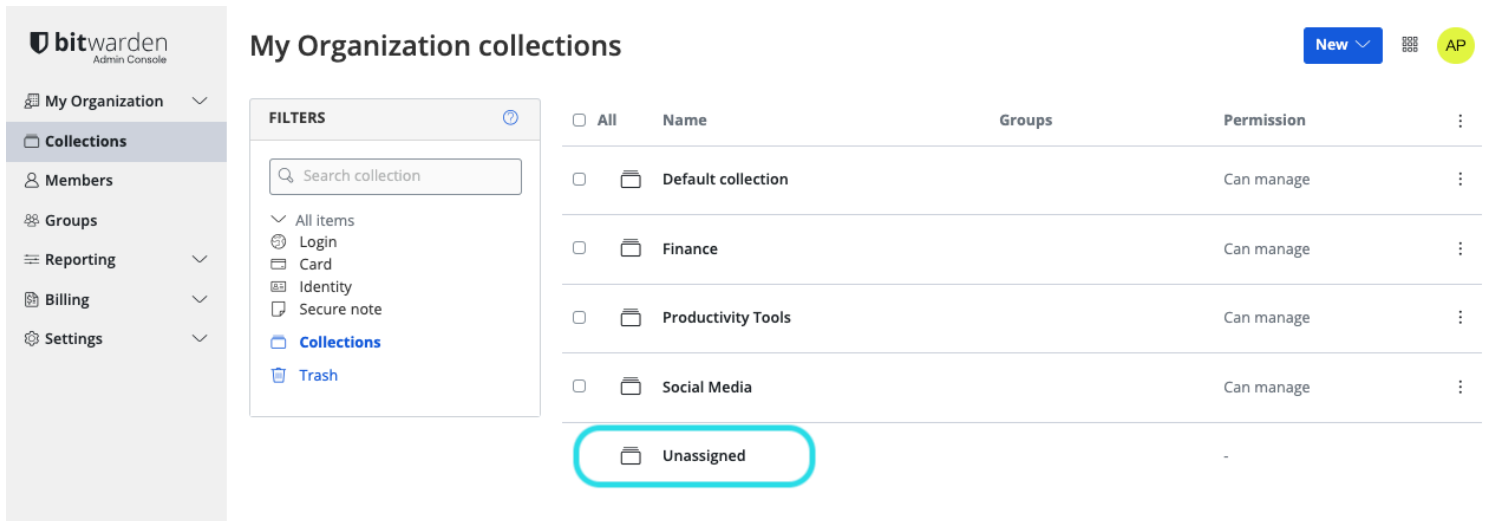

The screenshot shows the Bitwarden Admin Console interface. On the left, a sidebar contains navigation options: Password Manager, Vaults, Send, Tools, Reports, Settings, Password Manager, Secrets Manager, Admin Console, and Toggle Width. A red box highlights the 'Admin Console' option, with a red arrow pointing to the 'Collections' section in the main sidebar. The main content area displays the 'All vaults' view, which includes a search bar, a filter menu, and a table of vault items. The filter menu shows 'All vaults' expanded, with 'My vault', 'My Organiz...', 'Teams Org...', and 'New organization' listed. The 'All items' section is also expanded, showing 'Favorites', 'Login', 'Card', 'Identity', and 'Secure note'. The 'Folders' section shows 'No folder', and the 'Collections' section shows 'Default colle...' and 'Default colle...'. The table of vault items has columns for 'All', 'Name', and 'Owner'. The items listed are: 'Company Credit Card' (Owner: My Organiz...), 'Personal Login' (Owner: Me), 'Secure Note' (Owner: Me), and 'Shared Login' (Owner: My Organiz...).

Product switcher

### Note

Organization Admins, Owners, and users with the custom **Manage all collections** permission can access the **Unassigned** filter located in the Admin Console.

2. Select **Collections** from the Admin Console and choose the **Unassigned** filter:

Unassigned vault items

3. Select your unassigned vault items and use the options ( : ) menu to select **Assign to collections**:

Assign to collections

4. From the dialogue window, use the drop down to choose the collection(s) to assign these vault items to. Once you've chosen your collection(s), select **Assign**.

As long as you have permission to view the collection(s) and the vault items therein, those items will once again be displayed in your **All vaults** view. If you can't see those items in your **All vaults** view, double check which permissions you have to the collection(s) in question.
