Featured Highlights

Popular data privacy apps to know about
Last week was Data Privacy Week and we polled the Bitwarden community for their favorite data privacy apps. Check out the survey results for inspiration to help you stay secure.

Share some love through the gift of security
Identity theft can happen to anyone. Even to family members of cybersecurity experts. The senior director of product marketing at Bitwarden shares a story about when her mother experienced identity theft and how you can help your own family and friends prevent it.

Four reasons why students need password managers
All students, even the little ones in elementary school, can learn strong password habits that will last them a lifetime. Help students learn to protect themselves online today to build a better internet for tomorrow.

Bitwarden Bites: GIF Tips for the New Browser Extension UI

Change the default width:
Need more space? Go to Settings > Appearance to check out wide, extra wide, or compact mode.

Use 1-click copy:
Want 1-click copy for username and password? Go to Settings > Appearance to check the box for 'Show quick copy options on Vault.'

The many ways to autofill your logins:
Want autofill options? Try inline autofill, keyboard shortcuts, context menu, and fill button. Get how-tos for each.
Find all the new browser extension UI updates, tips, and more in the latest blog post.

Quick Tips: How-Tos for Common Scenarios

How to access your Bitwarden vault without a password
Instead of using your main Bitwarden password to log in, Bitwarden allows you to use another device or enable biometrics for a faster login experience. In the latest update you can now get approval from the web app. Give it a go!

How to create a folder in Bitwarden
If your list of credentials is growing into the double and triple digits, it's probably time to start organizing them in folders. And, did you know you can even create nested folders? Nested folders are subfolders nested within an existing parent folder for levels of organization.
