# Kontobyte

View in the help center:  
<https://bitwarden.com/help/account-switching/>

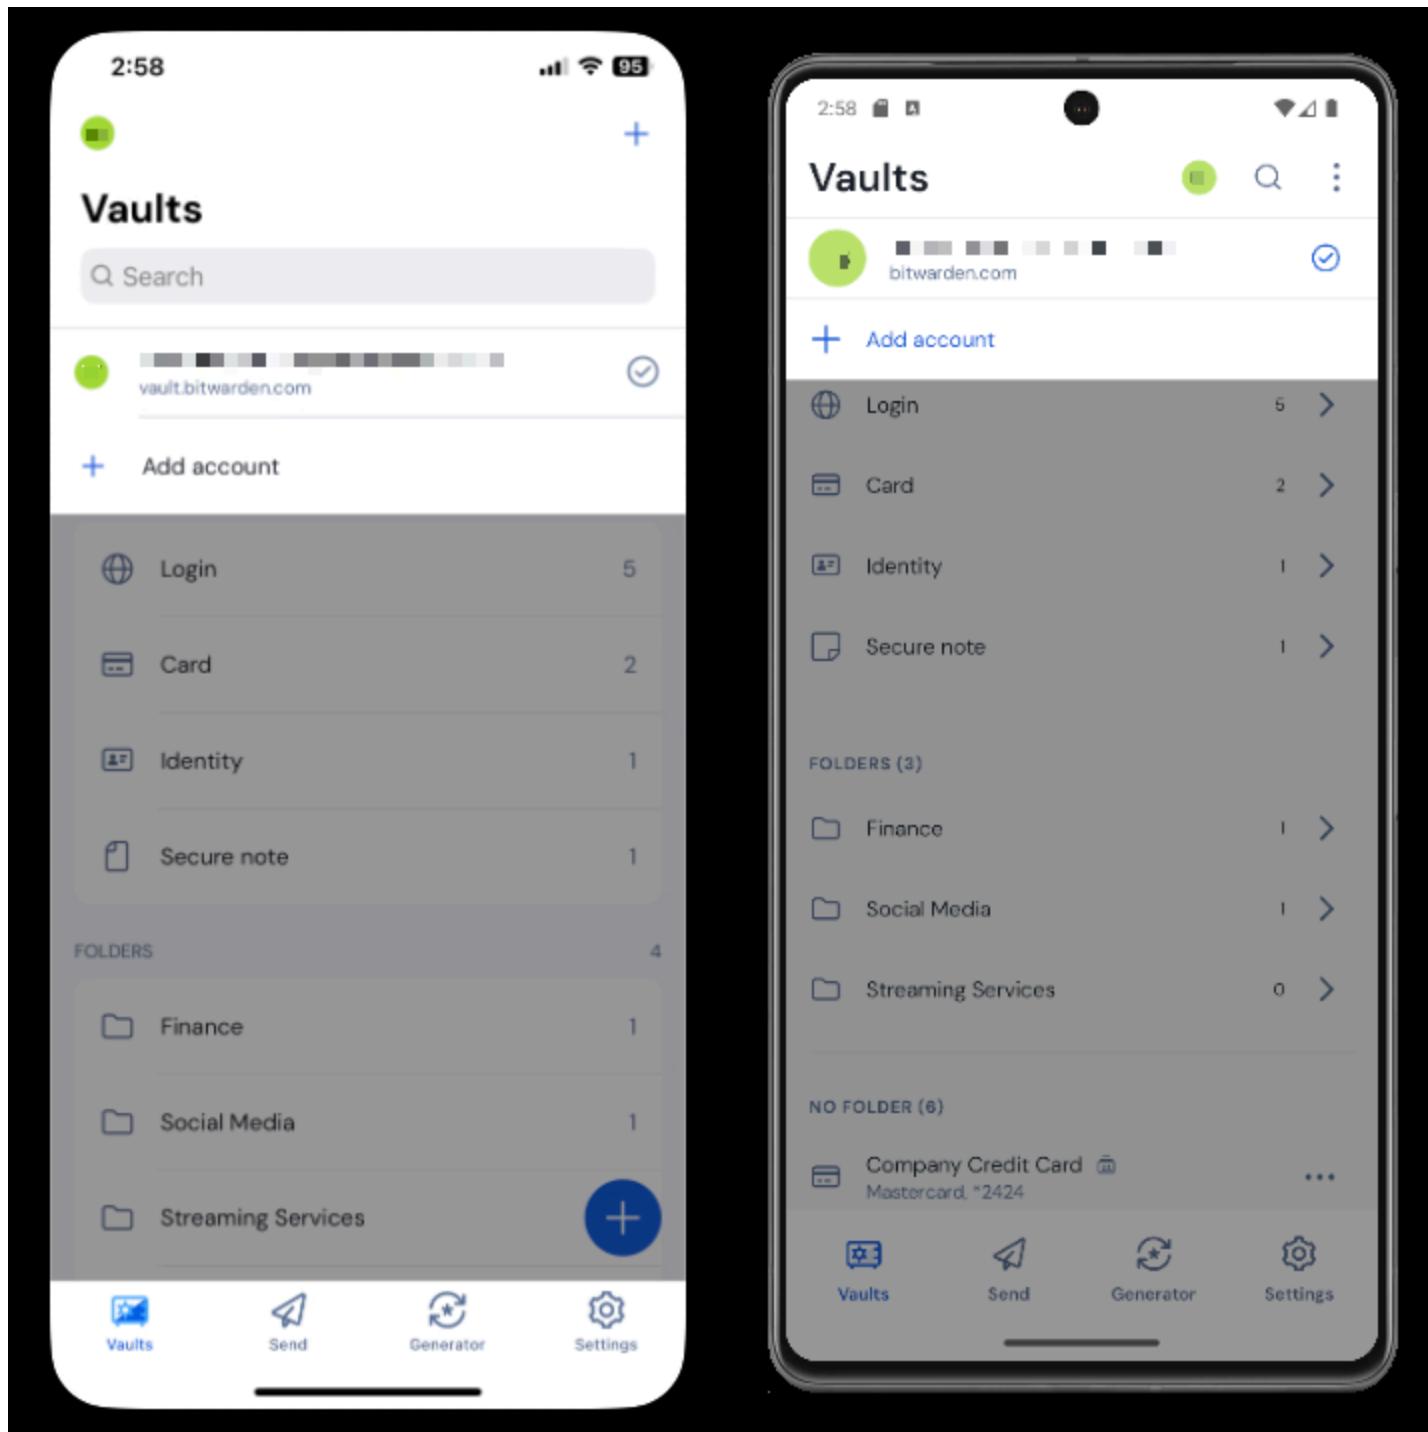

## Kontobyte

Visste du att du kan ha **upp till fem** Bitwarden-konton inloggade samtidigt med Bitwardens webbläsartillägg, skrivbordsapp och mobilapp? Använd kontobyte för att sömlöst växla mellan Bitwarden-konton som personliga konton och jobbkonton.

### Logga in på ett andra konto

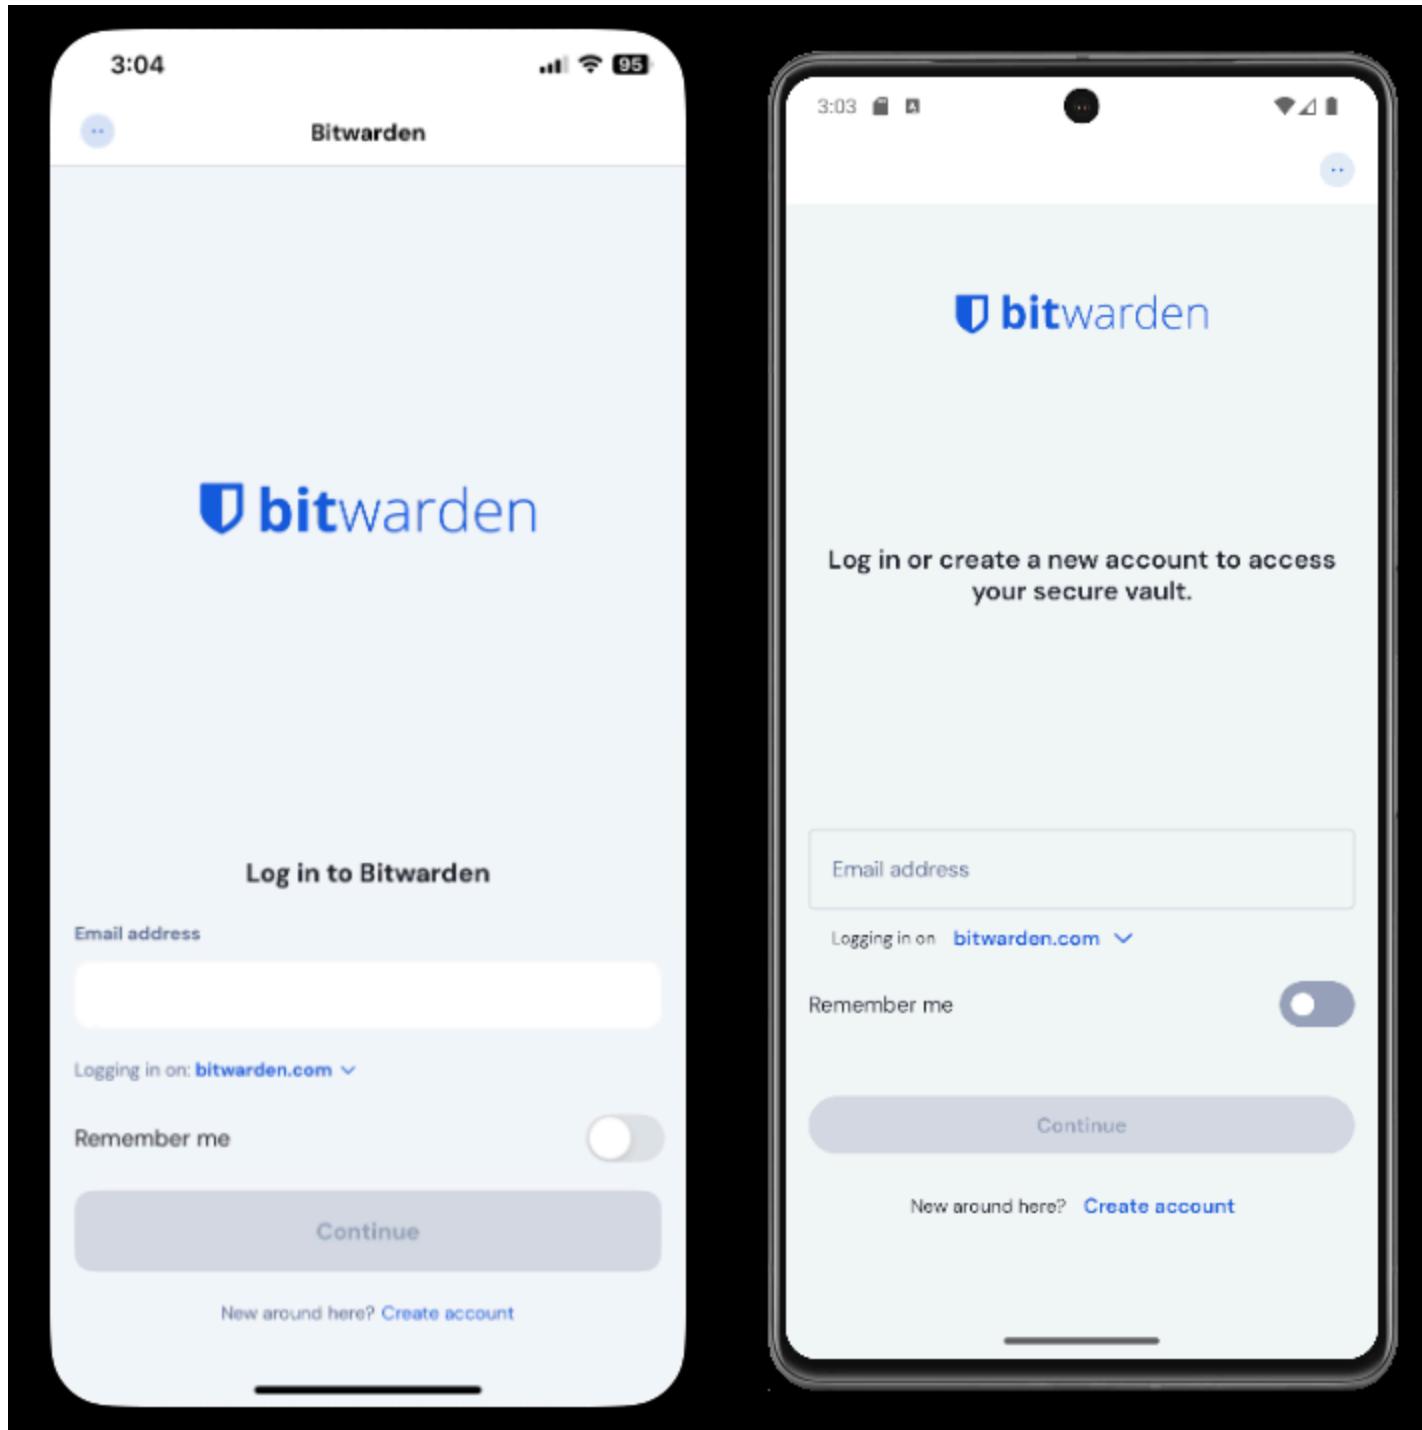

#### ⇒Mobile

To log in to a second (or third, or fourth, or fifth) account, select the currently logged-in account from the top menu bar and select **+** **Add Account**.

Account switching on mobile

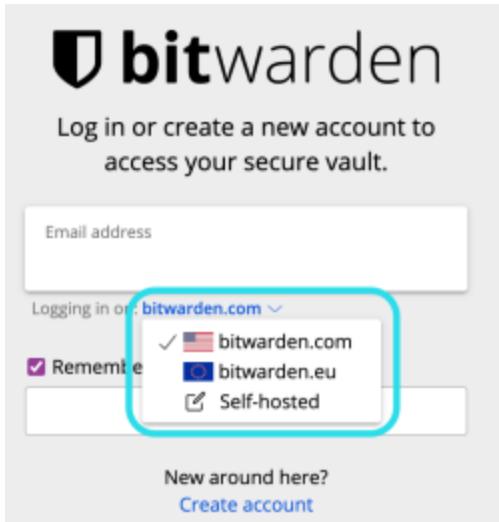

Selecting **+ Add Account** will take you to the login screen:

Log in on mobile

## Tip

If you have accounts on multiple servers, for example if an employer who self-hosts Bitwarden has issued you a [families organization sponsorship](#), use the **server selector drop down** that is located on the login screen and select the **Self-hosted** menu to change the **Server URL** to the URL for the account.

In this example, your work account may use something such as <https://your.company.bitwarden.com> and your families organization account would use <https://vault.bitwarden.com>.

Once you log in to your second account, you can quickly switch between them from the same menu, which will also show the current status of each account's vault (locked or unlocked). If you log out of one of these accounts, it will be removed from the list unless [vault timeout](#) is set to log out.

## Note

Most vault actions, including adding new items or folders, syncing, and settings such as [vault timeout](#) and [unlock \(PIN or biometrics\)](#) will only apply to the active account, which you can determine by the icon displayed in the top menu bar of the app.

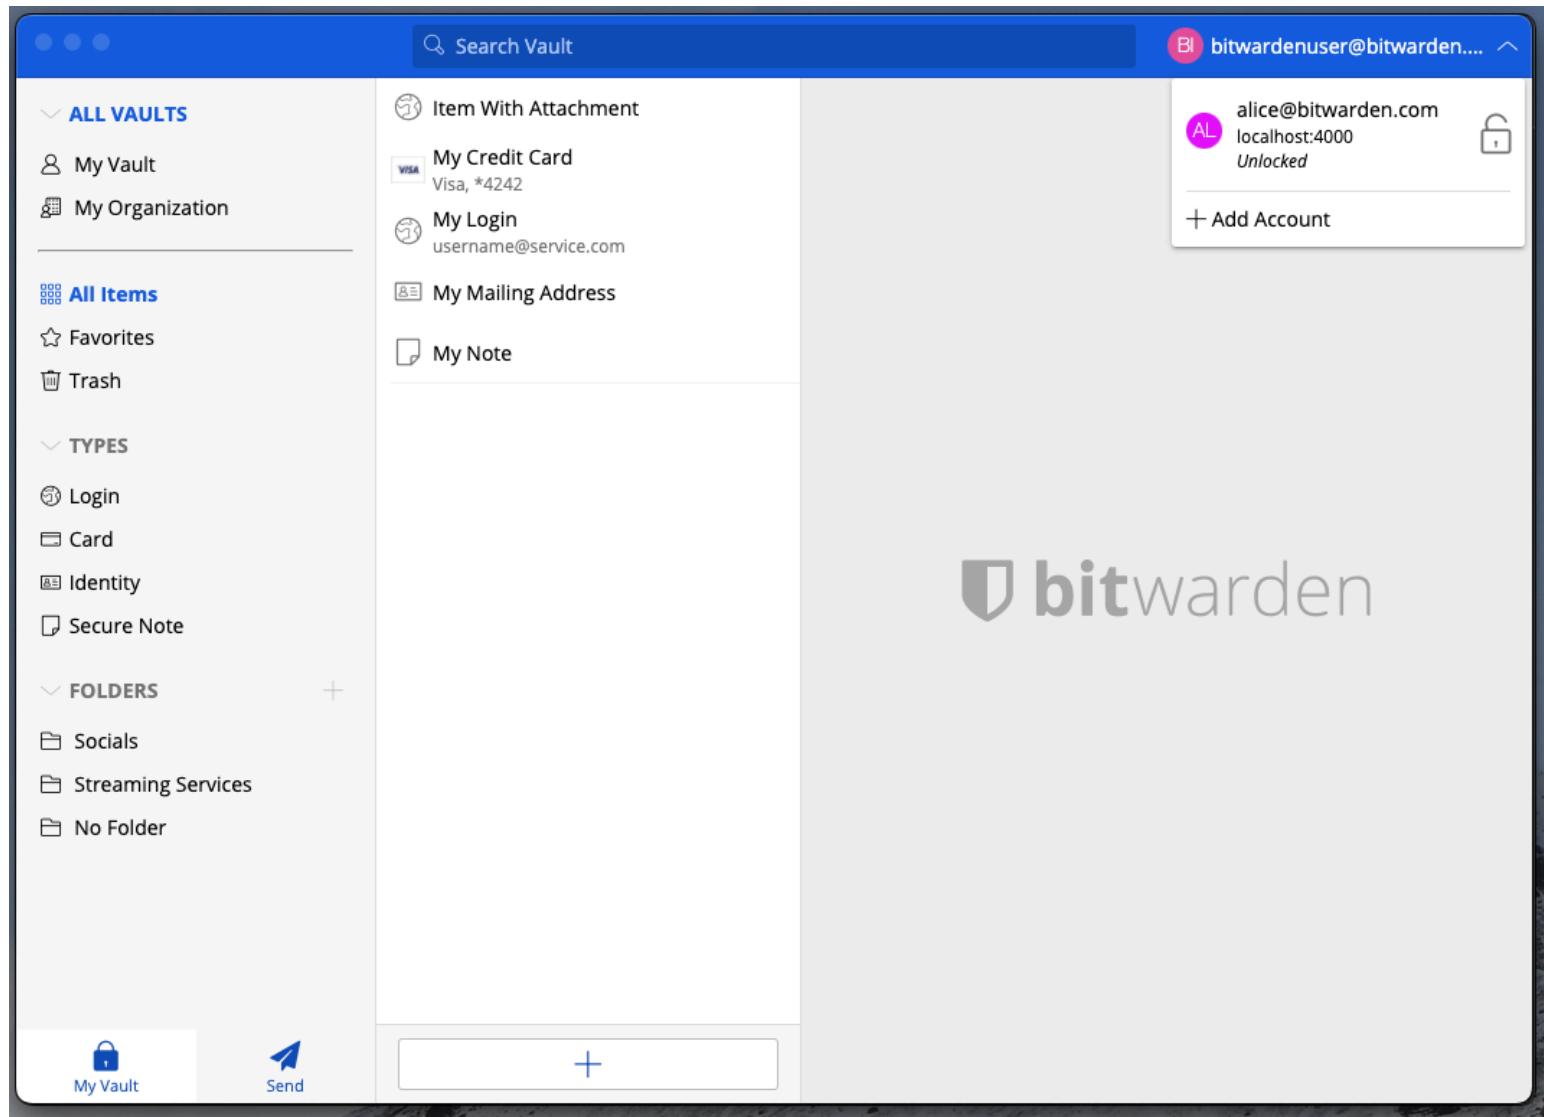

Some options such as [theme](#) are applied to all accounts.

## Auto-fill

If you're using account switching, your mobile app will default to auto-fill credentials from the currently active account, however, you can switch from one account to the other during auto-fill

## ⇒Desktop

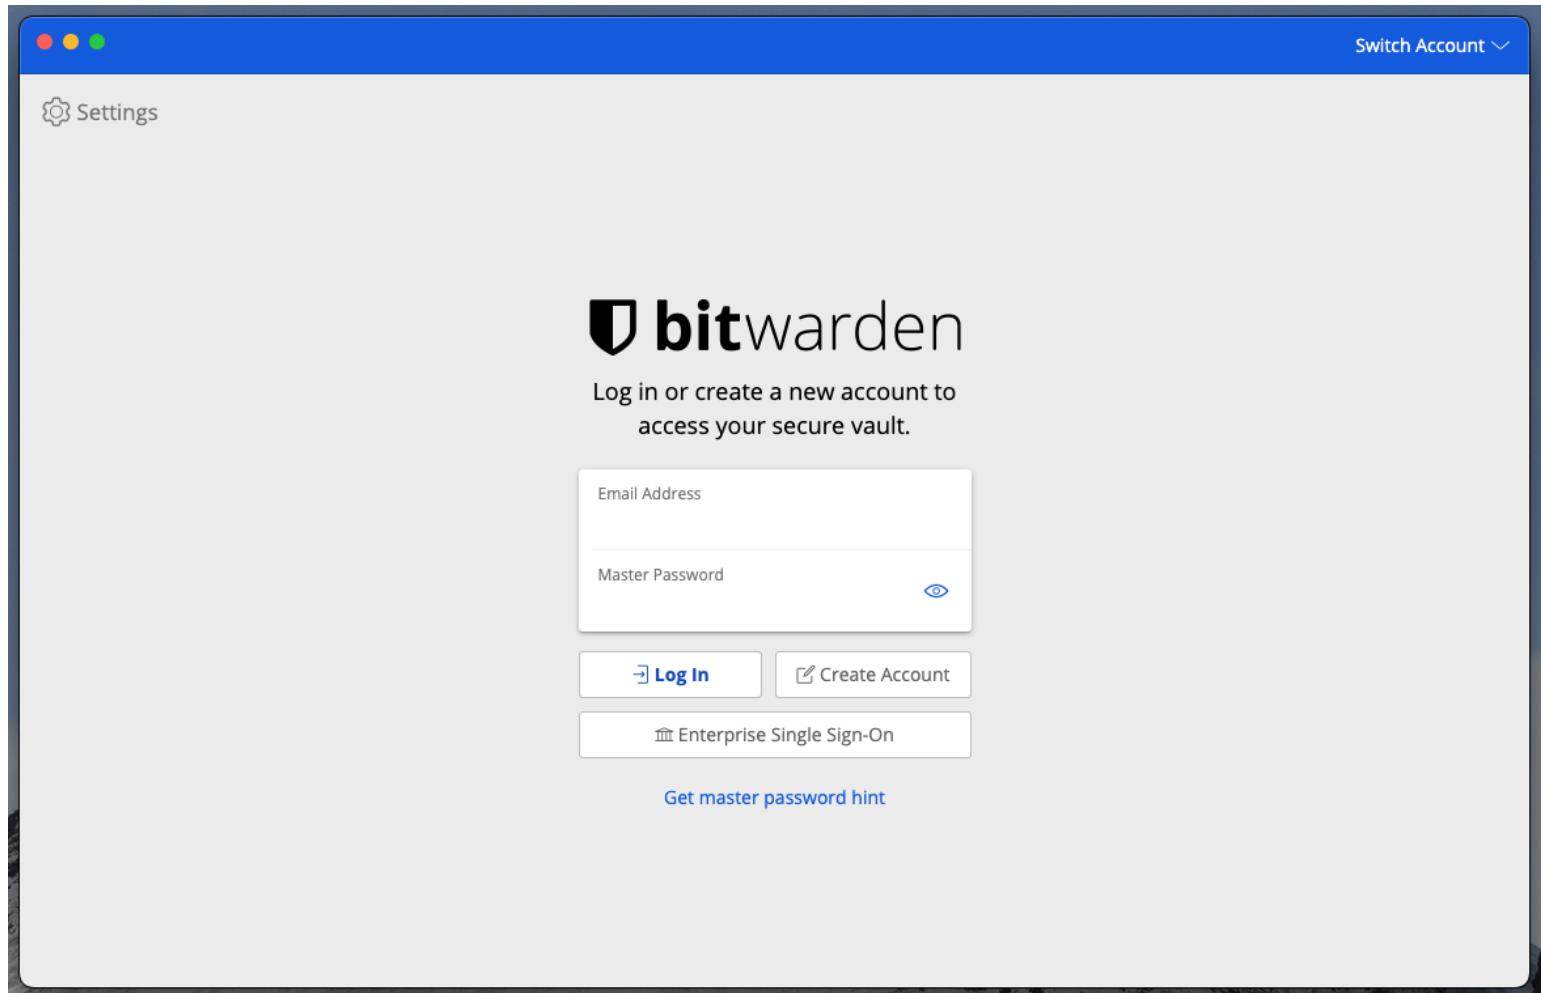

To log in to a second (or third, or fourth, or fifth) account, select the currently logged-in account from the top-right of the desktop app and select **+ Add Account**:

The screenshot shows the Bitwarden desktop application interface. On the left, there's a sidebar with navigation sections: ALL VAULTS (My Vault, My Organization), All Items (Favorites, Trash), TYPES (Login, Card, Identity, Secure Note), and FOLDERS (Socials, Streaming Services, No Folder). At the bottom of the sidebar are two buttons: 'My Vault' (with a lock icon) and 'Send'. The main area is titled 'Search Vault' and lists several items: 'Item With Attachment' (My Credit Card, Visa, \*4242), 'My Login' (username@service.com), 'My Mailing Address', and 'My Note'. In the top right corner, there's a user account card for 'bitwardenuser@bitwarden....' with a purple profile picture labeled 'AL', the email 'alice@bitwarden.com', the IP 'localhost:4000', and the status 'Unlocked'. Below the account card is a button '+ Add Account'. A large watermark for 'bitwarden' is centered in the background of the main content area.

Desktop App Account Switching

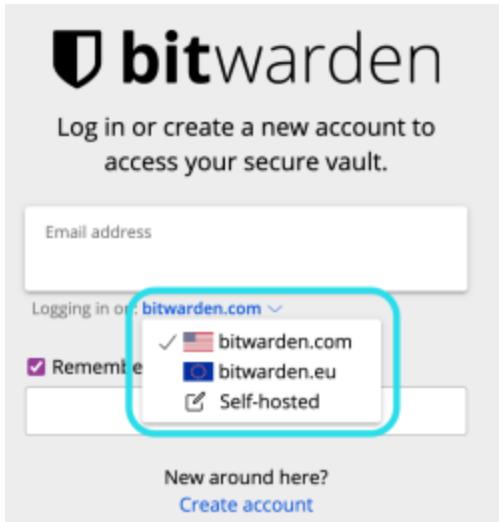

Selecting **+ Add Account** will take you to the login screen:

Desktop Account Switching

## Tip

If you have accounts on multiple servers, for example if an employer who self-hosts Bitwarden has issued you a [families organization sponsorship](#), use the **server selector drop down** that is located on the login screen and select the **Self-hosted** menu to change the **Server URL** to the URL for the account.

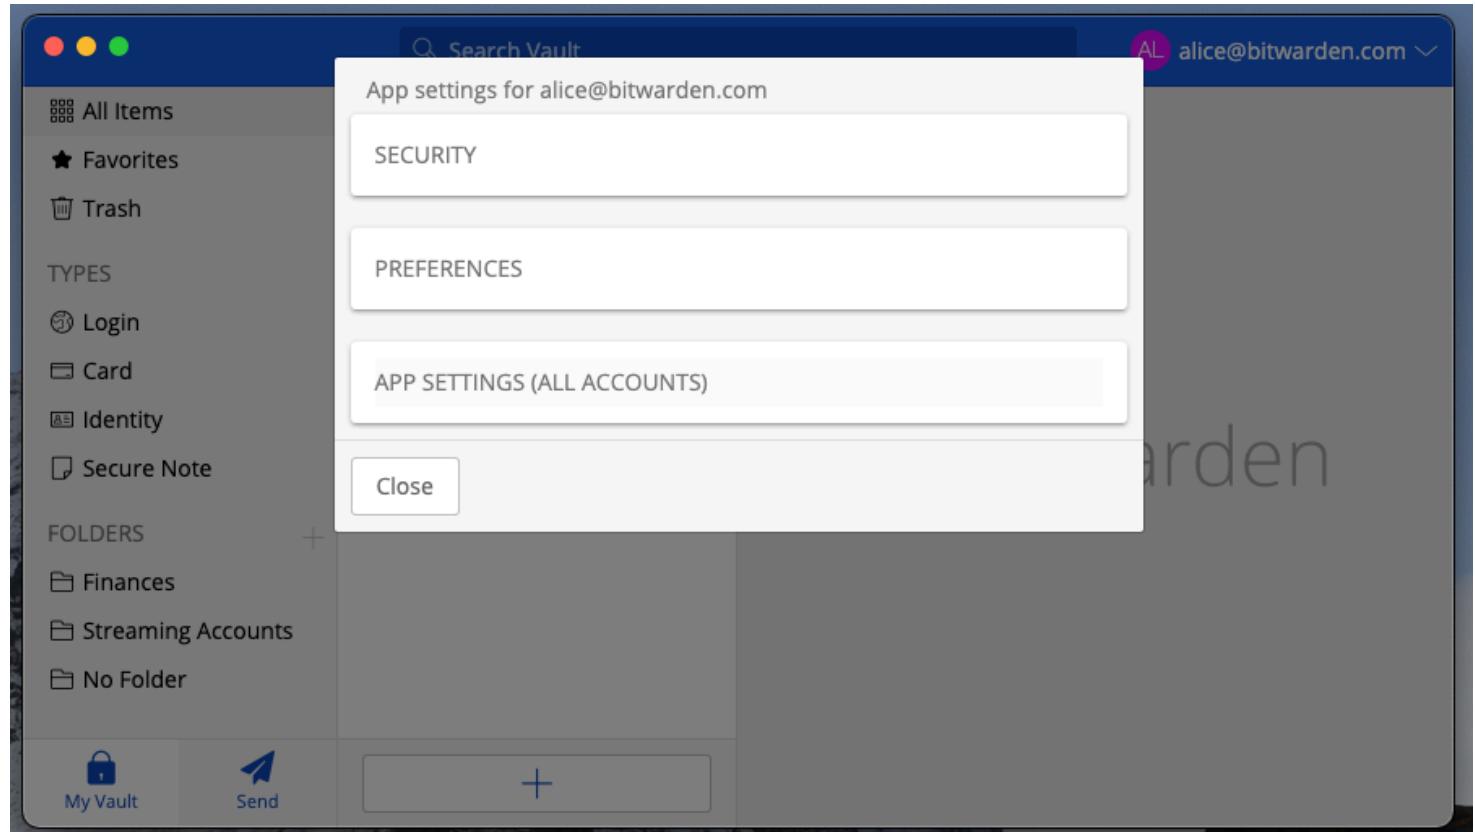

In this example, your work account may use something such as <https://your.company.bitwarden.com> and your families organization account would use <https://vault.bitwarden.com>.

Once you log in to your second account, you can quickly switch between them from the same menu, which will also show the current status of each account's vault (locked or unlocked). If you log out of one of these accounts, it will be removed from this list.

**ⓘ Note**

Most vault actions, including adding new items or folders, syncing, searching, and settings like **vault timeout** and **unlock (PIN or Biometrics)** will only apply to the active account, which you can determine by the email displayed in the top-right of the app.

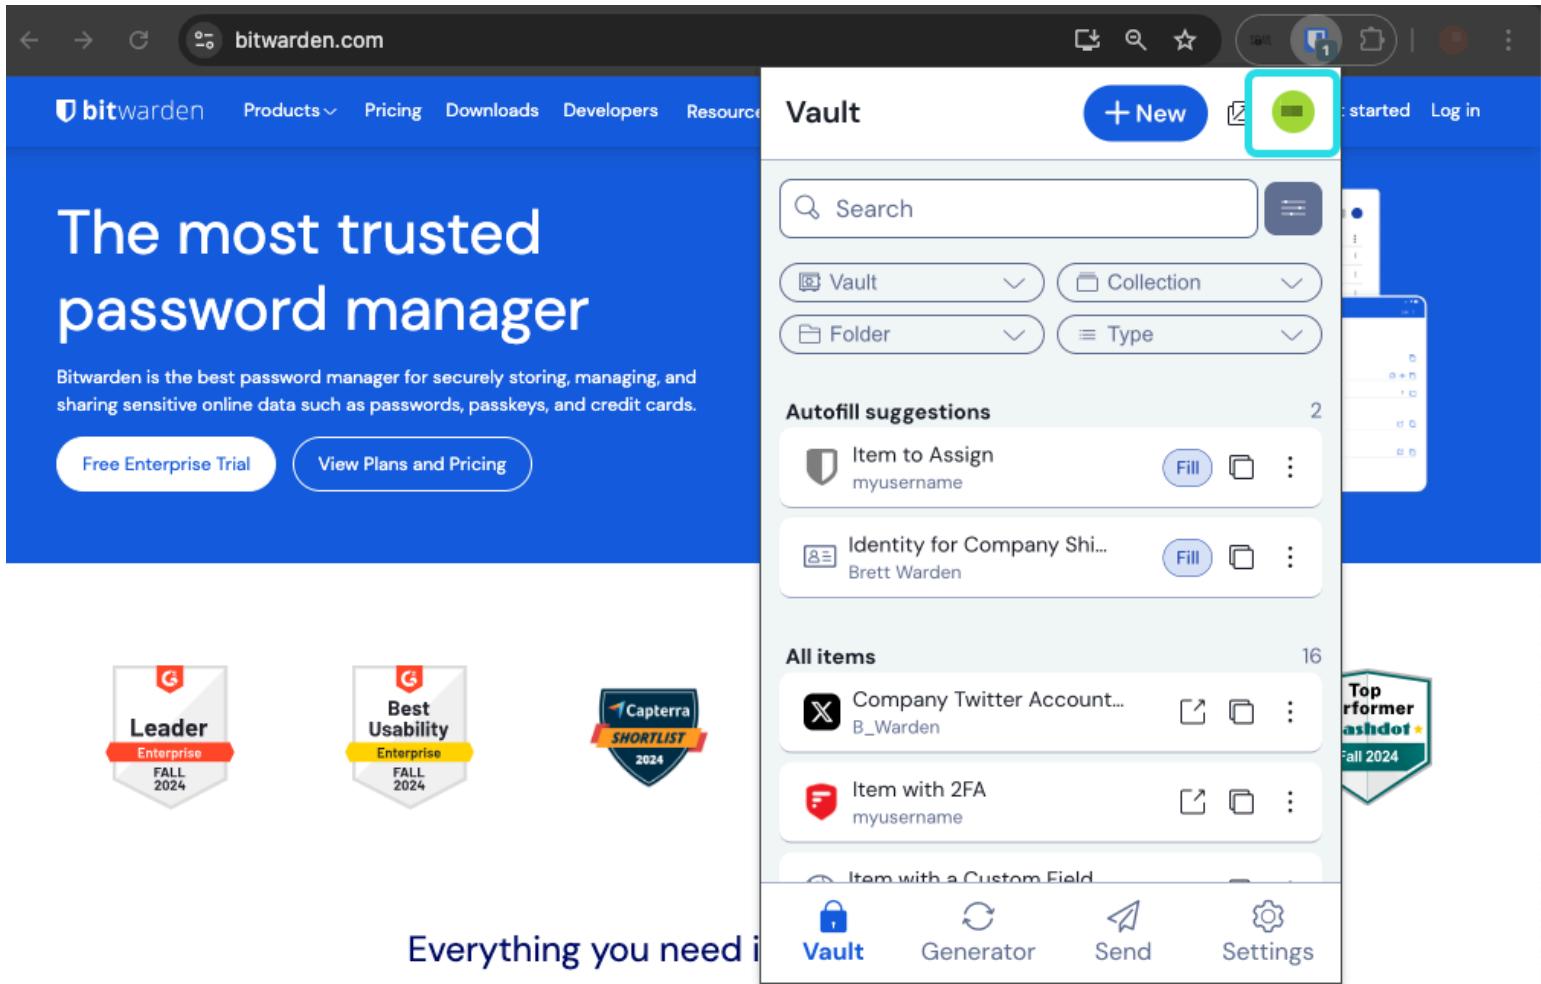

Some **Preferences**, however, are set for **All Accounts**:

Desktop App Preferences

**⇒Browser extension**

To log in to a second (or third, or fourth, or fifth) account, select the currently logged-in account from the top menu bar:

The most trusted password manager

Bitwarden is the best password manager for securely storing, managing, and sharing sensitive online data such as passwords, passkeys, and credit cards.

Browser extension account switching

Once you have selected the account icon, select **+ Add account** from the account switching menu:

The screenshot shows the Bitwarden homepage with a blue header. The header includes the Bitwarden logo, navigation links for Products, Pricing, Downloads, Developers, and Resources, and a search bar. Below the header, a large banner reads "The most trusted password manager". A sub-banner below it states: "Bitwarden is the best password manager for securely storing, managing, and sharing sensitive online data such as passwords, passkeys, and credit cards." It features two buttons: "Free Enterprise Trial" and "View Plans and Pricing". To the right of the banner is a sidebar titled "Account actions". This sidebar shows a list of accounts, with one account labeled "bitwarden.com active". Below this is a section titled "Available accounts" with a button "+ Add account". The "Available accounts" section is circled in red. Further down are sections for "Options" (with "Lock now" and "Log out" buttons) and "Everything you need" (with a "Browser extension" link). On the far right, there are several badge awards: "Leader Enterprise Fall 2024", "Best Usability Enterprise Fall 2024", "Capterra SHORTLIST 2024", and "Top Performer ashdot Fall 2024".

Browser extension [Add account](#)

Once you log in to your second account, you can quickly switch between them from the same menu, which will also show the current status of each account's vault (locked or unlocked). If you log out of one of these accounts, it will be removed from this list.

 **Note**

Account switching on the browser extension is not available on Safari at this time.

## Auto-fill

If you're using account switching, browser extension will default to auto-fill credentials from the currently active account.
