# **Set Enterprise policies**

$\mathbb{Q}$ Example $\mathcal{C}o$	py 🗀 🗎
Subject: Pro-tip for Bitwarden admins and owners	
Body:	
Hi [name],	
Today's onboarding tip is critical for getting your Bitwarden organization ready for more team members: <b>Set your Enterpris policies</b> .	se
Enterprise policies allow Bitwarden Enterprise organizations to enforce security rules for all users, such as requiring two-stellogin. It's how Bitwarden admins and owners set the right security foundations for their teams, and build a consistent deployment and user experience for all team members.	эр
Some policies will remove non-compliant users from the organization when enabled, and some are not retroactively enforces so now is the time to nail down your organization's policies.	ceable,
Learn more about how policies work here.

## **Groups & collections**

oupo a concollenc
♀ Example       Copy □         Subject: How to organization your data in Bitwarden
Body:
Hi [name],
Now that you've added items to your vault, it's time to set up collections and groups to ensure that the right users have access to the right credentials.
Organizing Bitwarden data with collections and groups will help you save time, automate permissions, and make items more discoverable.
Learn more about collections here.

# Invite your users

Ω Example		Conv C

Subject: 2 ways to automate Bitwarden user provisioning

#### Body:

Hi [name],

Scalable success with Bitwarden comes from provisioning users smoothly and securely. Here are the top ways new admins and owners automate the process of getting employees on Bitwarden.

#### SSO

With Login with SSO, Enterprise organizations leverage their existing Identity Provider to authenticate users with Bitwarden using the SAML 2.0 or OpenID Connect (OIDC) protocols. Learn about SSO.

#### **SCIM**

System for cross-domain identity management (SCIM) can be used to automatically provision members and groups in your Bitwarden organization. Bitwarden servers provide a SCIM endpoint that, with a valid SCIM API key, will accept requests from your Identity Provider (IdP) for user and group provisioning and de-provisioning. Learn about SCIM.

#### **Directory Connector**

The Bitwarden Directory Connector app automatically provisions users, groups, and group associations in your Bitwarden organization by pulling from a selection of source directory services. Provisioned users will be issued invitations to join the organization. Learn about Directory Connector.
